## PROJECTS:

- **Frontend College Website**

**Description:** I have designed a modern and visually appealing front-end and college website that seamlessly integrates intuitive navigation, captivating visuals, and informative content to provide an engaging user experience for students, faculty, and visitors.

- **Woman Safety Application**

**Description:** I have designed a human safety application that empowers users to stay secure in their daily lives. With its intuitive interface and advanced features, the app provides real-time location tracking, emergency alerts, and a comprehensive safety network, ensuring peace of mind for individuals and their loved ones.

- **Automatic Tractor Design**

**Description:** Designed a revolutionary automatic tractor design that combines cutting-edge AI technology with advanced sensors and precision controls, enhancing efficiency and productivity in agricultural operations while reducing labor and operational costs. Experience the future of farming with this innovative solution.

- **Drone**

**Description:** I designed and developed a compact camera drone for IIT Guwahati Techfest, capable of capturing high-quality aerial footage. Its lightweight design, stable flight control, and user-friendly features make it an ideal tool for aerial photography and videography.
